

Solution Technology Inc.

**Solution Technology Will Premiere ArmorPlus for BlackBerry®
Series 7200 at the 9th Annual Emerging Technology Showcase**

ArmorPlus for BlackBerry is the only 'all-in-one' integrated device providing applications for Barcode Scanning, GPS, Touch Screens with eSignature and Secure Data Memory Cards

Boca Raton, FL - October 26, 2006 - Solution Technology, Inc. today announced the premiere of ArmorPlus for BlackBerry® Series 7200 at the upcoming "Emerging Technology Business Showcase" (ETBS), November 3rd, 2006, in Fort Lauderdale, FL. Sponsored by the Enterprise Development Corporation (EDC), the event is designed to showcase the latest emerging technology and bioscience companies in the South Florida entrepreneurial community. Solution Technology was chosen to present and exhibit its patent-pending ArmorPlus for BlackBerry to over 200 anticipated attendees, including technology companies, service providers, research & development organizations and potential investors.

ArmorPlus for BlackBerry is the first wireless, mobile data device providing 'all-in-one', integrated applications for Barcode Scanning, GPS, Touch Screens with eSignature and Secure Data Memory Cards. It combines multiple applications in a ruggedized case to deliver optimum performance for the demanding data needs of large, mobile enterprises.

ArmorPlus for BlackBerry offers a true Class 2 laser barcode scanner from Symbol Technologies. It enables scanning of virtually any barcode configuration and can be deployed in typical environments, such as inventory control in transportation, and critical environments, such as patient ID and Rx in healthcare. User-friendly API supports both direct and browser data entry.

The ArmorPlus for BlackBerry GPS option is a comprehensive GPS satellite navigation system, which works Off-road and Off-net, including a high-sensitivity mode for use in obstructed areas. Integrated with an SD memory card slot for user installed maps and location data, the ArmorPlus GPS can be deployed for field sales & services, transportation, law enforcement, construction – anywhere that location tracking is required.

The Touch Screen Window option provides both touch data and signature capture capabilities with a stylus and a touch-sensitive, transparent window mapped over the BlackBerry screen. ArmorPlus for BlackBerry options combined yield an 'all-in-one' solution for enterprise and government organizations to efficiently record transactions and transmit data in the mobile workforce.

Designed for durability in real work environments, the ArmorPlus for BlackBerry device is encased in a form-fitted, high durability, impact resistance case with a Lexan protective window. The case provides maximum protection from impacts in any direction and is tested for multiple drops from two meters onto concrete. It is ergonomically designed for comfortable hand fit and has all BlackBerry controls and functions fully accessible.

“We are thrilled to be selected to present and exhibit our ArmorPlus for BlackBerry mobile data solution at the “Emerging Technology Business Showcase”, said Dan Doczy, CEO, Solution Technology, Inc. “Our mobile data solution for government and commercial services in transportation, healthcare, insurance, construction, manufacturing, homeland security, law enforcement, public safety, telecommunications and more – is perfectly-positioned for this technology forum.”

See ArmorPlus for BlackBerry® at the “Emerging Technology Business Showcase” on November 3, 2006, 8:30am -3:00pm, Westin Cypress Creek, 400 Corporate Drive, Ft. Lauderdale, FL, www.edc-tech.org.

About Solution Technology, Inc.

Solution Technology, Inc., a BlackBerry Alliance member, is a global developer and distributor of proprietary technologies, including the ArmorPlus for BlackBerry. The ArmorPlus for BlackBerry is physically integrated to provide additional functions that permit an expanded range of enterprise applications through BlackBerry devices.
